WORK EXPERIENCE

AI Engineer (GenAI / Automation) 10/2025 – 01/2026
Innopard GmbH Remote

- Co-developed an internal self-hosted workflow/ticketing web application; delivered features and bug fixes across a TypeScript-based full-stack codebase.
- Implemented chatbot behavior including conversation context/memory via Claude SDK; collaborated on agent-related features and reliability debugging.
- Set up and maintained CI/CD and multi-environment deployments; standardized deployment triggers through a commit-based workflow.
- Containerized services and supported reproducible local/production setups using Docker; resolved runtime and configuration issues.
- Built small n8n automations, integrating external tools via APIs/webhooks.

Data Analytics Consultant (Working Student) 01/2023 – 09/2025
Innopard GmbH Remote

- Supported a large-scale insurance data migration with data checks, reconciliation, and quality controls across multiple datasets.
- Maintained SQL code based on customer requirements to ensure efficient data querying and processing.
- Communicated with related departments to clarify and fulfill data requests, ensuring accurate and timely delivery of information.

Mentor CE (Working Student) 10/2019 – 03/2020
Technische Universität Darmstadt Darmstadt

- Mentored first-semester students on study organization; prepared and conducted regular meetings.

EDUCATION

M. Sc. Computational Engineering 10/2022 – 07/2025
Technische Universität Darmstadt Darmstadt

- Specialization: Computer Science (Deep Learning Focus) · Thesis Grade 1.3

B.Sc. Computational Engineering 09/2018 – 09/2022
Technische Universität Darmstadt Darmstadt

- Specialization: Computer Science

PROJECTS / RESEARCH

Master Thesis: Privacy Leakage in LLM Activation Editing
Investigated privacy risks and mitigation strategies in activation editing of LLMs (Tech: Python, PyTorch, Transformers).
Code available upon request.

Fuel Price Prediction (Data Science Project)
Time series forecasting for mobile application using historical price data (Tech: Python, Pandas, Scikit-learn).

Neural Network Compression (Deep Learning Project)
Compression techniques for neural networks in federated learning contexts (Tech: Python, PyTorch).

SKILLS

LLM/GenAI
Claude SDK, AI Agents, Tool-Use, Conversation Context/Memory, RAG (familiar)

Automation
n8n, REST APIs, Webhooks, MCP Integrations

Engineering
TypeScript, Python, Docker, CI/CD, GitLab, Linux/SSH, Caddy

Data
SQL, PyTorch, Pandas, Scikit-learn, Transformers
